

## CLEANING, HOOK AND BAR PLACEMENT INSTRUCTIONS

### CLEANING:

To clean your Tutu Etoile classical, or romantic skirts you must have a soft scrub brush and mild detergent without bleach. You can soak your tutu in the bathtub to get the dirt loosened up and then with a brush, gently scrub it. Rinse thoroughly and then hang upside down to dry. Make sure your net is straightened out (before you let it dry) so it doesn't lose its shape. Between cleaning, spray your tutu with *vodka* or *Febreze* to eliminate body odor. We do not suggest dry-cleaning your skirts. The chemicals used in the dry cleaning process can cause the net or tulle to soften.

To clean your Bodices or Tunics made from Bengaline or Brocade you may dry clean them professionally or by using *Dryel* or hand wash them with a mild soap but please remove the décor before hand washing. To spot clean bodices or tunics, use *Everblum Cleaning Fluid*. They also make a great makeup remover. If your Bodices or Tunics are made of Stretch Velvet we recommend hand washing.

To clean your travel bag, scrub with brush and mild detergent and lay flat to dry. Do not machine wash or dry clean. We also suggest spraying it with scotch guard to keep it from soiling.

### HOOK AND BAR PLACEMENT:

To stitch on your hooks and bars you need a needle, thread and a pencil (or pins to mark placement). When stitching all hooks and bars /loops be sure to stitch through as many layers of fabric as you can and use a doubled heavy duty thread to prevent the threads from ripping away.

1. With the Tutu or Tunic on the dancers body, have a partner mark the hook and bar placement while holding the Basque closed with pins. The fit of your costumes depend upon the personal choice of the dancer. "Traditionally" the rule is the tighter the better.

#### Skirt

2. Place the large hook and bar on the waistband. The large hook should be facing in toward the body and on the inside of the right side of the Basque aligning with the edge of the fabric. The large loop will be exposed; it will be on the outside of the left waistband with the edge of the loop placed exactly where you want the waist to close.

#### Skirt (panty), Bodice and Tunic

3. For the small hooks and bars the same applies as above for the sides and direction the hook and bars face. The hooks should be placed 1/4in. or more in from the edge of the right side. The bars will be stitched vertically, exactly where you want your costume to close. These all should be placed approximately 1 to 1.5 inches apart. It is recommended that you stitch on the hooks first as this will determine the exact placement of the bars.

Basque, panty and bodice placement;

a. The first hook and bar should be placed in the middle of the Basque, Panty or Bodice.

b. The second and third should be placed at the top and base of the Basque, Panty and Bodice.

c. From there, continue to split the sections in half until there is about 1 – 1 1/2" space between them.

**Note:** for a flatter classical skirt, place tutu under heavy books for at least 24 hours.
